

# CIT Service *(please tick)*

Form - G3  
2025 / 2026

Service Closure ☐

Service Re-location ☐

Service Re-activation ☐

Service Modification to Existing ☐

## Applicants Details

Owner Name/s *(as per land title)*: \_\_\_\_\_

CIT Account Number *(if existing)*: \_\_\_\_\_ Contact Phone Number: \_\_\_\_\_

Postal Address: \_\_\_\_\_

Email Address: \_\_\_\_\_

## Property Details

CIT Outlet Number <i>(in known)</i>	
Property Title - Volume	
Property Title - Folio	
Section / Lot	

## Re-location to:

## Modification:

Property Title - Volume		Current Size	
Property Title - Folio		New Size	
Section / Lot			

The Trust is responsible for any infrastructure upstream of and including the water meter. The Trust will maintain, rectify, repair and upgrade any of its infrastructure. The customer is responsible for any infrastructure that conveys water to their property downstream of the water meter. Customers are responsible for any maintenance, repairs or upgrades of their infrastructure.

All water supplied by CIT is extracted directly from the river. The water is not filtered or treated, and it is not potable or fit for human consumption. Occasionally, when there is limited irrigation demand for water in our piped systems, anaerobic conditions can develop within the pipelines and tanks resulting in water developing an unpleasant smell. In these events it is recommended that Non-Drinking Water customers switch to their backup storage. Once irrigation demand recommences the problem will normally dissipate.

By agreeing to the service installation I/we will pay the system access charge declared for the Trust until the service is disconnected and a disconnection fee has been paid.

**I/We agree to operate the service in accordance with Trust policy and acknowledge the Terms of Supply**
